

AgilSpace is the signature brand for satellite and remote sensing products and services offered by ST Electronics (Satcom & Sensor Systems) Pte Ltd.

AgilSpace focuses on GeoServices, satellite and related subsystem solutions.

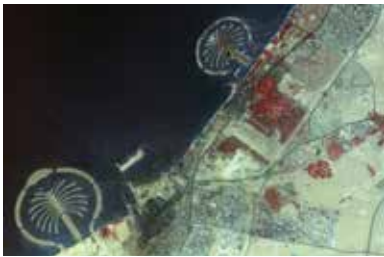

GeoServices - provide high data availability and responsive geospatial and remote sensing services.

Satellite Solutions - design, develop and the manufacture of small satellites to help meet customers' satellite mission objectives.

Subsystem Solutions - develop and supply cost effective and modular space-qualified products.

Solution Focus

GeoServices

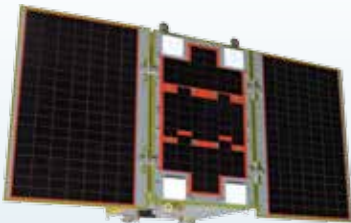

Provide multi-source satellite data and value-added services to meet specific requirements of global customers

Subsystem Solutions

Supply space-qualified modules and also full capability in developing customised high performance subsystems and solutions

Satellite Solutions

Specialises in cost-effective turnkey mission design, small satellite manufacturing and full suite of satellite engineering services

Target Vertical Markets

**Environmental/
Agriculture /
Forestry**

**Homeland Security
& Border Control**

**Humanitarian Aid
& Disaster Relief**

**Land Resource
Management**

**Maritime Security
& Safety**

**Consultancy
Services**

In-House Engineering Capabilities & Facilities

ST Electronics (Satcom and Sensor Systems) is staffed by an experienced satellite design and engineering team through its joint venture company, ST Electronics (Satellite Systems). Equipped with state-of-the-art satellite testing and manufacturing facilities, our capabilities include design, development and production of advanced satellites for Earth observation applications. We offer a comprehensive suite of remote sensing solutions to customers worldwide.

Advanced Satellite Testing & Production Facilities

Facilities Include:

- Assembly-Integration-Test (AIT)
- Manufacturing and Assembly (M&A) Facility
- Thermal Vacuum Chamber Facility
- Thermal Vacuum Bake-Out Chamber
- Vibration Shaker Table
- Ground Station Ready

Note: All specifications are subject to change without notice.
